Not illustrated. 1917 Excerpt: .two weeks before she began the wonderful cure, and the case had been stationary about six months. Two weeks after cessation of the two month s treatment with Lung Germine I found the disease had advanced about 50 per cent. The whole of the upper lobe of the left lung was involved and the process had extended to the lower portion of the upper lobe and the upper portion of the middle lobe of the right lung. It will be but a short time before this poor woman is dead. That the stuff not only has no value but is absolutely harmful, as the above report indicates, is not surprising in the light of the analysis made by the Association laboratory which follows: t REPORT OF THE LABORATORY A bottle of Lung Germine, which had been purchased directly from the Lung-Germine Company, was submitted to the...
