

# Compilation of Geologic, Hydrologic, and Ground-Water Flow Modeling Information for the Spokane Valley-Rathdrum Prairie Aquifer, Spokane County, Washington, and Bonner and Kootenai Counties, Idaho: Usgs Report 2005-5227

Filesize: 5.78 MB

## Reviews

*I actually began looking over this ebook. I could possibly comprehended everything using this published e publication. You wont feel monotony at at any time of your time (that's what catalogues are for regarding if you request me).*

*(Arnold Nienow)*

## **COMPILATION OF GEOLOGIC, HYDROLOGIC, AND GROUND-WATER FLOW MODELING INFORMATION FOR THE SPOKANE VALLEY-RATHDRUM PRAIRIE AQUIFER, SPOKANE COUNTY, WASHINGTON, AND BONNER AND KOOTENAI COUNTIES, IDAHO: USGS REPORT 2005-5227**

To read **Compilation of Geologic, Hydrologic, and Ground-Water Flow Modeling Information for the Spokane Valley-Rathdrum Prairie Aquifer, Spokane County, Washington, and Bonner and Kootenai Counties, Idaho: Usgs Report 2005-5227** PDF, you should follow the hyperlink beneath and save the ebook or gain access to other information which are highly relevant to COMPILATION OF GEOLOGIC, HYDROLOGIC, AND GROUND-WATER FLOW MODELING INFORMATION FOR THE SPOKANE VALLEY-RATHDRUM PRAIRIE AQUIFER, SPOKANE COUNTY, WASHINGTON, AND BONNER AND KOOTENAI COUNTIES, IDAHO: USGS REPORT 2005-5227 book.

Proquest, Umi Dissertation Publishing, United States, 2011. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The U.S. Geological Survey, in cooperation with the Idaho Department of Water Resources and Washington Department of Ecology compiled and described geologic, hydrologic, and ground-water flow modeling information about the Spokane Valley-Rathdrum Prairie (SVRP) aquifer in northern Idaho and northeastern Washington. Descriptions of the hydrogeologic framework, water-budget components, ground- and surface-water interactions, computer flow models, and further data needs are provided. The SVRP aquifer, which covers about 370 square miles including the Rathdrum Prairie, Idaho and the Spokane valley and Hillyard Trough, Washington, was designated a Sole Source Aquifer by the U.S. Environmental Protection Agency in 1978. Continued growth, water management issues, and potential effects on water availability and water quality in the aquifer and in the Spokane and Little Spokane Rivers have illustrated the need to better understand and manage the region's water resources. The SVRP aquifer is composed of sand, gravel, cobbles, and boulders primarily deposited by a series of catastrophic glacial outburst floods from ancient Glacial Lake Missoula. The material deposited in this high-energy environment is coarser-grained than is typical for most basin-fill deposits, resulting in an unusually productive aquifer with well yields as high as 40,000 gallons per minute. In most places, the aquifer is bounded laterally by bedrock composed of granite, metasedimentary rocks, or basalt. The lower boundary of the aquifer is largely unknown except along the margins or in shallower parts of the aquifer where wells have penetrated its entire thickness and reached bedrock or silt and clay deposits. Based on surface geophysics, the thickness of the aquifer is about 500 ft near the Washington-Idaho state line, but more than 600 feet within the Rathdrum Prairie and more...
