PMU BASED MONITORING FOR RENEWABLE INTEGRATION IN SMART GRID

LAP Lambert Academic Publishing Apr 2016, 2016. Taschenbuch. Book Condition: Neu. 220x150x4 mm. Neuware - The conventional electric grid is a network of transmission lines, substations, transformers and more that deliver electricity from power plants to homes and industry. However, with increasing global industrialization and population growth, the grid is being stretched, resulting in the increased likelihood of failures during peak load hours. In addition, the current grid has difficulty accommodating variable sources of power like wind and solar energy....

Reviews

This publication is indeed gripping and interesting. It can be filled with knowledge and wisdom You will not really feel monotony at anytime of your time (that's what catalogues are for regarding in the event you request me).

-- **Prof. Muhammad Lesch MD**

Here is the best publication i have go through right up until now. Better then never, though i am quite late in start reading this one. Its been developed in an remarkably basic way in fact it is simply right after i finished reading this pdf through which basically transformed me, change the way in my opinion.

-- **Colin Bergnaum**
