The report also estimated that its aggressive-investment scenario, which assumed that rail-Composition of Class I Railroad roads would make substantial investments to improve Traffic, 2004 and expand service, would require between 205 billion 43 and 225 billion over 20 years. (Share of tons carried) The Bottom Line Reports cost and benefit estimates were intended more to be illustrative than to be quantitatively precise. The authors did not specify the timing of the Other (21) costs and benefits and did not attempt to state net bene-fits in terms of present discounted value. Because the Food and Kindred Coal benefits are likely to come later in the time period than Products (43) the costs, the estimates presented in the report are likely (5) to overstate the net benefits. That is, in present-value Mixed terms, the net benefits would likely be less that the Bot-Shipments (6) tom Line Report suggested. In that case, the capacity ex-pansion needed to meet future demand might be less Nonmetallic than the report indicates. Minerals (8) Farm Rail traffic appears to be growing faster than the Chemicals Products (9) AASHTO report projected, underscoring the importance (8) of addressing capacity issues but rendering the report Source: Congressional Budget Office based on Association of more useful for its qualitative insights than for its quanti-American Railroads, Class I Railroad Statistics (July 13, tative estimates. 2005), available at www. aar....
