Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Report on the Progress of the Survey: From January, 1888, to January, 1890 Sir: I have the honor to make the following report on the progress of the Geological Survey of the State for the two years ending December 31, 1889: In my last biennial report I gave a review of the work of the Survey from the time it came under my direction, in 1880, to the close of the year 1887; and also called attention to some of the results obtained by the Survey. As this report has been published in the Public Documents (1887-88) where it can be seen by persons who wish information on the work of the Survey, I will not dwell upon work done previous to the year 1888. The scope of the work can be better understood by dividing it under the following heads: (1) Topographic Work: The surveying in the field and platting of maps of the counties of the State on a scale of two miles to the inch; the completion of an accurate map of the entire State. (2) The Geological Work: Putting the geology on the maps; obtaining information respecting the extent, thickness, and quality of the various strata of coals, iron ores, clays, etc.; making careful measurements of coal for publication; averaging samples for analysis; testing, to determine coking properties of coals; studying relations to available transportation routes; and also relations to resources in adjacent States; a study of kinds, quality and distribution of timbers; to publish accurate geological maps, and carefully prepared and accurate reports to accompany these maps. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic...
